1 Sprint reflection sprint 5

1.1 Main Problems Encountered

Problem 1. We slightly underestimated how difficult it would be to determine the best way to define the relations between beliefs and goals.
Reaction. We will discuss this with Koen en Joost to see what they think about this.

Problem 2. After discussing with Koen en Joost we discovered that the way we implemented the emotion base would best be done differently.
Reaction. We will implement their suggested method in the next sprint.

1.2 Adjustments for next sprint plan

As mentioned above next sprint we will add the task of figuring out the best way to define relations between beliefs and goals and the task of implementing the emotionbase.
