1 Sprint reflection sprint 8

1.1 Main Problems Encountered

Problem 1. The estimations for the effort of the last sprint were off by a bit. This is mainly because someone made the estimations for the first time and he did not know how much time would have been spent on the final report.
Reaction. We cannot change it for next week but a better review with all members can fix this problem.

Problem 2. A very strange update on the Integratio-documents repo on the master occured this week. The master was suddenly outdated by 40 commits (about 18 days).
Reaction. We did not know what happened but Tim helped us to fix it by merging another branch that was even with the master as it was before.
